PERSONAL SUMMARY

Motivated and detail-oriented frontend developer with expertise in HTML, CSS, JavaScript and React JS. Skilled in creating responsive and interactive web sites using modern web technologies. Committed to delivering high-quality solutions in collaborative team settings.

EXPERIENCE
Fresher

PROJECTS

Project 1: Portfolio Website- **Project Description: A personal portfolio website showcasing your skills and experience in frontend development.**

- Technologies Used: HTML, CSS, JavaScript, and potentially other frontend technologies.
- Features:
- A home page introducing yourself and your skills.
- A projects page showcasing your projects, including descriptions, screenshots, and links to live demos or GitHub repositories. - An about page providing more information about your background, experience, and interests.
- A contact page with a form or email address for potential employers or clients to get in touch with you.

Project 2: UrbanFood Food Ordering Frontend Website- **Project Description: A frontend website for food ordering, built using React, Redux, JavaScript, Bootstrap, Framer Motion, CSS, React Router, and Firebase.**

Technologies Used:
- React for building reusable UI components, including the use of:
- Hooks (e.g., useState, useEffect) for managing state and side effects in functional components.
- Context for sharing data between components and managing global state.
- Redux for managing state and props.
- JavaScript for adding interactivity and dynamic effects.
- Bootstrap for responsive design and layout.
- CSS for custom styling and layout.
- React Router for client-side routing.
- Firebase for backend integration (e.g., authentication, data storage).
- **Features:**
- A home page showcasing featured food items and promotions.
- A menu page with a list of food items, filters, and sorting options.
- A contact page for any query.
- A cart page for users to review and manage their orders.
- A checkout page for users to complete their orders.
